

Profile

Frontend Engineer with hands-on experience building React and TypeScript applications for live products, with a strong focus on UI performance, reusable components, and clean implementation. Brings commercial product experience from Bobnet and earlier delivery exposure across Next.js, Redux Toolkit, testing, and modern frontend workflows. Best suited to frontend roles where speed, usability, and maintainable code matter.

Key Skills

React, TypeScript, Next.js, JavaScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Git, REST APIs

Professional Experience

Bobnet, Bucharest

Aug 2023 to Present

Frontend Engineer

- Build and maintain touchscreen interfaces for smart vending machines using React and Redux in a live product environment.
- Reduced operator error rates by 30% by improving interface clarity, flow, and usability across customer-facing machine interactions.
- Cut dashboard load times by 40% by refining Redux Toolkit state synchronisation and improving rendering performance in a complex back-office environment.
- Increased click-through rates by 22% through cleaner frontend implementation of UX/UI requirements using Tailwind CSS and CSS Modules.
- Built a reusable React Native component library with centralised state management, helping accelerate mobile feature delivery by 35%.
- Standardised reusable UI patterns across cross-platform work, improving frontend consistency and delivery speed.

Capgemini, Cluj-Napoca

Aug 2022 to Aug 2023

Full-Stack Engineer

- Improved feature delivery speed by 20% by building modular Nest.js services in a cleaner backend architecture.
- Built and maintained a Jest testing suite with 95% code coverage, contributing to a 40% reduction in production bugs.
- Optimised PostgreSQL schema and indexing, reducing query response times by 50%.
- Enhanced the CI/CD pipeline with Docker and deployment automation, shortening release cycles by 60%.

Capgemini, Cluj-Napoca

May 2022 to Aug 2022

Frontend Engineer Intern

- Integrated REST API endpoints into a Next.js application, supporting early delivery of 3 key features.
- Reduced bundle size by 20% through tree-shaking, code splitting, and lazy loading.
- Refactored global state logic using Redux Toolkit, improving maintainability and reducing boilerplate across multiple components.
- Worked with QA on edge-case coverage and release quality, contributing to an estimated 40% reduction in post-release bugs.
- Built practical experience in frontend delivery, API integration, and performance-focused implementation in a team environment.

Education

Undergraduate coursework

2020 to 2021

1 December 1918 University, Alba Iulia

Completed one year of undergraduate coursework in C++, OOP, Assembly, UX/UI, Design, and Web Architecture.

Courses

React Engineer Certificate, React Engineer Certificate

JavaScript Pro: Mastering Advanced Concepts and Techniques, Udemy
